
Watch Hulu on the Go With Downloads

By Jim Denney, VP, Product Management and Helena Cerna, Director, Product Management

Planning on traveling this fall or for the holiday season? Now you can watch Hulu on the go with our latest feature — Downloads! Available today on iOS for viewers on our Hulu (No Ads) plan, you'll now be able to download thousands of shows and movies -- like past seasons of hit series including *Family Guy*, *Desperate Housewives*, *This is Us*, *How I Met Your Mother*, and *ER*, as well as Hulu Originals like *The Handmaid's Tale*, *Shrill* and *The Act* -- to take with you on the go. Now, with Hulu, you can watch what you want, when you want...even when you don't have an internet connection.

Navigate to the Downloads tab at the bottom of your screen to access your downloaded content. To find more shows and movies to download, click "See What's Downloadable" and browse through thousands of titles just a few clicks away.

Looking for a specific movie or show? Search for any title on Hulu and if it's available for download, you'll see a download icon on the details page. Viewers can download up to 25 titles across 5 different devices and will have up to 30 days to watch their downloaded content. For watched content, the download will expire two days after starting playback. After downloaded content expires, viewers can renew an expired download when online, if that content is still available on Hulu. To gain access to downloads, update your iOS app today! Downloads will be coming to Android users soon.
